

MP100 Series 3kVA & 5kVA UPS

**MP100 UPS WITH
TYPICAL EXTERNAL BATTERY CABINET**

The MP100 Series incorporates a microprocessor controlled design using advanced high frequency Pulse Width Modulated (PWM) techniques. The result is a compact, low component count UPS providing unequalled reliability and performance with very low noise

switch as standard. In addition to this a manual Make-Before-Break switch is also provided for additional system reliability and ease of maintenance.

The alarms and the ON/OFF switch are incorporated into the front fascia of the unit.

DESIGN FEATURES

- True on-line design
- Static Bypass Switch as standard
- Maintenance Bypass Switch
- High frequency Pulse Width Modulated (PWM) microprocessor controlled
